AMP-D50-V1 – Stereo Class-D Amplifier with USB Audio

Design finished, not manufactured TPA3255 · XMOS XU316 · KiCad

A self-designed stereo Class-D amplifier built around the TPA3255, with USB-C audio and analog RCA inputs. The target is 2 × 50 W into 4 Ω from a 28 V supply. Schematic and PCB are finished, but nothing has been built or measured yet.

KEY POINTS

- Schematic and four-layer PCB for 2 × 50 W into 4 Ω from 28 V
- USB-C audio input and analogue RCA inputs
- Documented with block diagram, signal flow and power distribution

KEY DATA

TECHNOLOGY
TPA3255 · XMOS XU316 · KiCad

PLATFORM
Circuit board, 4 layers

STATUS
Design finished, not manufactured
