INDIGATE IGW-100 Industrial Retrofit & IIoT Gateway

Design, in progress | STM32H573 · KiCad

An industrial communication and data acquisition gateway for digitalizing existing machines and plants.

KEY POINTS

- Ethernet, 2 × RS-485 and CAN-FD, galvanically isolated
- 8 digital inputs, 4 high-side outputs (24 V), 2 analogue inputs (0–10 V / 4–20 mA)
- USB-C, NOR flash, microSD, real-time clock and hardware watchdog

KEY DATA

TECHNOLOGY
STM32H573 · KiCad

PLATFORM
Circuit board, 6 layers

STATUS
Design, in progress

ACCESS
Files and source code on request
