ProvisionPro – Restaurant Inventory Management as a Web App (SaaS)

Demo online React · TypeScript · Fastify

A multi-tenant web application for restaurants: ingredients, recipes with costing, stock batches by FIFO and FEFO, purchasing with orders and goods receipts, reorder suggestions and mobile scanning by barcode or QR code. It runs in the browser, with a trial period and licensing, in German, English, Vietnamese and Chinese.

KEY POINTS

- Recipe costing and stock batches by FIFO and FEFO
- Purchasing with orders, goods receipt and reorder suggestions
- Mobile barcode or QR scanning, trial and licensing, four languages

KEY DATA

TECHNOLOGY
React · TypeScript · Fastify · PostgreSQL · Docker

PLATFORM
Web (SaaS, multi-tenant)

STATUS
Demo online

ACCESS
